

Participants Needed!

Would you like to meet someone from a different cultural background?

WHAT: The SPEAK! Program is designed to help older adults who may be experiencing symptoms of mild cognitive impairment connect with people who seek to increase their English language speaking skills. The older adults have regularly scheduled social contact with a person from a different culture, while the person who wants to become more fluent in English has an opportunity to practice informal English with a fluent speaker.

YOU NEED: (1) A computer or device (phone or tablet) with internet, (2) webcam access, and (3) about 1 hour per week
