

Are you currently 65 or older, and drive at least once per week?

If so, you may be eligible to participate in a research study looking at the relationship between driving and cognition over time.

Participants will be compensated up to \$1,050 over 2 years.

You may be eligible if:

- You are age 65 or older
- Have normal thinking and memory skills for your age
- Have a valid driver's license
- Drive at least once per week
- Drive a car that is model year 1996 or newer

Participants are asked to:

- Visit the U-M Neuropsychology Clinic once for an assessment of thinking and problem solving
- Undergo a PET scan of your brain
- Visit the U-M Dearborn Driving Clinic once for a computer-based simulated drive and fixed course drive
- Have a data collection device and small camera installed in your vehicle
- Drive as you normally would for 1-month with the collection device in your vehicle
- After 2 years, repeat the thinking tests and driving data collection
