

Participants Needed

For a Research Study on Memory and Aging

What is this study about?

We aim to better understand the effects of cognitive training as a possible method for improving cognition

We are recruiting older adults with or without cognitive complaints and actual cognitive deficits for a training research study.

What will you do in this study?

Participants will undergo multiple cognitive training sessions which will take place either in the lab or at home. Each training session lasts between 30 minutes and 3 hours. Some of the visits may include magnetic resonance imaging (MRI) of the brain which uses magnetic fields.

You may qualify if you are:

- +60 years old
- Native English speaker
- Right-handed
- Normal/corrected hearing & vision
- No history of drug or alcohol abuse

Cost:

There is no cost to you. In fact, you will be compensated for your time.

If interested, send an email to **MemoryTrainingStudy@umich.edu** or call **(734) 647-3704** and leave your age and contact information.
