ARE YOU AGE 65 OR OLDER?

The Michigan Neural Distinctiveness (MiND) study (HUM00199054) invites you to participate in a paid research study about brain aging!

Purpose of the Study
- To understand how brain changes explain age-related cognitive changes over time

Who can participate?
- Age 65 or older
- In good health
- Native English speaker
- Right-handed
- Normal or corrected-to-normal vision, hearing, and motor control

What will it involve?
3 sessions on separate days at University of Michigan’s Ann Arbor campus
- **Session 1** lasts approximately 2 hours 15 minutes and consists of cognitive tasks
- **Session 2** is 2 hours and includes cognitive tasks and a 50-minute MRI scan
- **Session 3** is only a 1.5 hour MRI scan
